

# Website Building: CSS Variables

## CSS – Dark Mode

---

The following exercise contains the following subjects:

- ◆ CSS Variables

### Instructions

Thanks to CSS variables it is very easy to create a dark mode theme for any web site.

1. [Download the template](#)
2. Read the comments in the index.js file carefully.
3. We already gave you a big hint that we are attaching a class “dark-mode” to an element. What element would that be and how could that help us?

[Here is an example video](#). Feel free to be more creative than this.

### Ninja:

Make the animation between dark mode and light mode smoother. Like in the video.

Google CSS transitions.

Submit the file to Hive.
